#	Software Requirement	Acceptance Criteria	Module	FP Score	Effort Score	Priority				Bold = Main tasks
1	Given a customer, the customer should be able to make an order.	Given I am a customer who has already placed an order, when I select to review my order, then I will be directed to a page that contains information regarding my previous order.	Frontend	181.15	875.29782	H	3.2			Other = subtasks
2	Given a customer, the customer should be able to review their orders placed earlier.	Given I am a customer who has already placed an order, when I select to review my order, then I will be directed to a page that contains information regarding my previous order	Frontend	117.21	874.8630934	H	3.3			
3	Given a customer, the customer will use their device's camera to scan the QR code and obtain the menu	Given I am a customer, when I scan the QR code with my camera, then I will be redirected to the restaurant's website	Frontend	63.97	601.3481867	H	2.6			Lead
4	Given a customer, the customer should be able to know how to cancel their order in a simple manner.	Given I am a customer who wants to cancel an order, when I look on the webpage, then I should be able to view a cancel button and be notified of the process	Frontend	85.3	488.4073657	H	4.1			Larry Delgado
5	Given an owner, the owner's restaurant will generate a global QR code amongst all locations for the customer.	Given I am the owner, when I generate a global QR code for my website, then whenever anyone scans that QR code they will be taken to the restaurant's website	Backend	159.87	391.591027	H	2.5			Annie Tran
6	Given a customer, the customer should be able to see a menu from any web accessible application	Given a customer, the customer should be able to view all products' name, price, and description sold by Maui Chicken.	Frontend	138.56	391.5062548	H	1.1			Luke Sunoaka
7	Given a customer, the customer should be able to select a quantity and purchase a product(s) by clicking on the appropriate field below the description to add to shopping cart.	Given I am a customer, when I increase the quantity for a product I am ordering, then the quantity I have selected will be the quantity accounted for in my order.	Frontend	138.5	390.9978786	H	1.2			Nima Fathali Siah
8	As a owner, the customer should be able to view any changes made to the website so that any special promotions will not go unnoticed.	Given I am the owner, when I update the website in any way, then the customer should be able to view the changes I have applied.	Frontend	127.87	307.7025366	H	1.6			
9	Given an owner, the owner should be able to access back-end only website where all order transactions are made.	Given I am an owner, when I log in to the website, then I will be able to access and view information and transactions unviewable otherwise	Backend	53.37	178.9808953	H	4.2			
10	Given an employee, the employee should be able to access back-end only website where all order transactions are made.	Given I am an employee, when I log in to the website, then I will be able to access and view information and transactions unviewable otherwise	Backend	53.37	178.9808953	H	4.3			
11	As an owner, the owner wants to take in online orders without being liable for any security leaks.	Given I am the ower, I would like all liabilities regarding online payment to be unrelated to me. This could be obtained by using a third party API such as Square.	Backend	0.04	178.2775655	L	3.7			
12	As an owner, the owner wants to promote their Yelp restaurant page on the website.	Given I am the owner, I would like for my Yelp page to be promoted so that my customer's can see any other customer reviews made.	Frontend	0.04	178.2775655	L	1.7			
13	As an employee, the employee should be able to manage the menu inventory on whether the menu is still available.	Given I am an employee, when I change inventory for menu items, it should reflect on the website as available or not available	Backend	42.71	91.72839237	M	4.7			
14	As a customer, the customer should know if a menu item is available upon ordering. If isn't, they will alerted by the location, and it will be removed from their shopping cart.	Given I am a customer, when I order something that isn't available, it will not be ordered and I will receive a notification that it is unavailable	Middleware	42.7	91.66397636	M	4.8			
15	As an owner, the owner wants an updated and clean displacement of restaurant information.	Given I am the owner, when I update information regarding the restuarant, then it will reflect on the website itself	Backend	42.66	91.40661392	H	1.5			
16	Given a customer, the customer should be able to add a order to the order queue of customer orders.	Given I am a customer, when I place an order, that order will automatically be added to the order queue	Backend	85.3	91.34234867	H	3.5			
17	Given an employee, the employee should be able to view the order queue of all orders made within the restaurant.	Given I am an aplyee, when I attempt to view the order queue, then I will be able to see the internal queue for orders and their information	Backend	85.29	91.31022734	H	4.4			
18	As a owner, the owner should be able to update any product information as well as any menu change.	Given I am the owner, when I update information regarding the menu, then it will reflect on the website's menu	Backend	85.26	91.21390855	H	2.4			
19	As a customer, I should be able to pick a location upon placing my order out of all three locations.	Given I am a customer, once I finish an order and select a location, then my order will be sent to that location	Frontend	106.56	70.21749007	M	3.4			
20	As an employee, the order should reach my location to enter the queue of other orders made within the restaurant.	Given I am an employee, when I receive an order, then it should enter queue	Backend	74.61	61.12462403	M	3.6			
21	Given an employee, the employee should be able to manually set a timer on when the customer's order will be ready.	Given a customer, the customer should be able to view how long their order will take.	Backend	213.13	38.52601887	L	3.1			
22	As an employee, the employee wants to know which delivery order is being picked up by whom in order to keep customer orders organized.	Given I am an employee, when a customer places an order for pick up, I will know who will be picking it up	Backend	63.97	38.52601887	L	4.6			
23	As a customer, the customer should be able to view the payment screen with all of their orders listed and submit their order.	Given I am a customer, I would like to see a sub-total count with order details will appear before entering checkout.	Frontend	32.02	38.50795415	M	2.2			
24	Given a customer, the customer should be able to identify food based on their preferences in a simple, organized display made on the menu.	Given I am a customer, when I see a menu item tagged with a symbol, then I will know that the specific item has a characteristic that could abide to a dietary or flavor preference	Frontend	95.9	38.45980919	L	1.3			
25	As a customer, the customer should be able to view their shopping cart, and check what they have ordered so far.	A shopping cart page should load containing any pending orders before a checkout button, with the option to change quantity	Frontend	53.32	22.30979107	H	2.3			
26	Given a customer, the customer should be able to contact any given Maui Chicken restaurant location.	Given I am a customer who needs assistance, when I select a phone number for a specified location, then I will be able to call the restaurant and speak to a Maui Chicken worker.	Frontend	159.87	22.27215506	M	1.4			
27	As an employee, the employee can notify a customer by phone recorded on a log if the order isn't picked up within a set time.	A customer will be called according to the phone number they provided in their order details found in the queue or database logs	Backend	53.29	22.27215506	L	4.5			
28	As a customer, the customer should be given the ability to pay online by credit card form.	Given I am a customer, I should be able to pay for my order online through a simple click of a button. Furthermore, the payment system should be easy and self intuitive.	Backend	21.37	11.49022768	H	3.8			
29	As an employee, the employee can notify a customer by phone recorded on a log if the order isn't picked up within a set time.	Given I am an employee, when an order is not picked up on time, then I can notify the customer by checking the number tied to that order	Backend	42.67	11.43386366	L	4.9			
30	As a owner, I would like to log all orders made by customers in the past and log them for three days. Logs past three days will be deleted.	As a owner, I should be able to review all recorded logs in my database for at least 3 days. After 3 days, these logs will get deleted unless specified.	Backend	32.02	4.831578762	M	4.9.5			
31	As a owner, the owner should be able to send a receipt about a order that has just been placed to the respective customer.	As a owner, I should be able to provide customer with a receipt regarding the order that they just placed on top of being able to review the customer's order.	Backend	31.97	4.808980208	H	3.1.5			
32	As a customer, the customer should be able to receive a downloadable receipt.	As a customer, when I place my online order, I would like a digital copy of my receipt to review my order.	Frontend	32.02	1.431578892	H	3.9			
33	Given a customer, the customer will see the restaurant's recommendation at the home page.	As a customer, I would like to see what Maui Chicken has to offer and would like details about the restaurant's recommendations	Frontend	53.29	1.427558861	L	2.1
